

RIVER TABLE Casting Resin

LuciClear

Epoxy Casting Resin

Experienced users are extremely enthusiastic about this product.

LuciClear Casting Resin has been formulated to be the most spectacularly water clear casting resin we have ever seen. You can use it to do 50mm deep bubble free castings in a single pour*.

Ideal for River Tables and embedding Badges, Coins, Shells, and Gems.

- Deep bubble free casting in a single pour.
- No need to use a vacuum chamber to ensure bubble free casts.
- Low temperature rise so it won't damage items being embedded or force air bubbles out of them or the timber edges of your river tables.
- Low temperatures - Low fumes - Safer than most other systems
- Absolutely minimal shrinkage.
- Very low viscosity and low surface tension to flow into the most minute details of items being encapsulated.
- Spectacularly crystal clear clarity.
- Contains UV absorbers to minimise yellowing due to UV exposure.
- Has unlimited shelf life, will not deteriorate in storage.
- Casting procedure tested in ambient temperatures from 15°C to 30°C.

This is an Australian formulated product which is extremely suitable for river tables and embedding specimens. Boatcraft Pacific has used our 30 plus years of epoxy experience to bring you a casting resin which ticks all the boxes.

*These thicknesses are for low volume pours, e.g. embedments. Large volume (more than 1 litre) e.g. River Tables have additional requirements and limitations. Detailed information is provided.

Comprehensive instructions are supplied. We have done many castings with it, and are happy to provide further advice by phone.

Available in 750ml, 1.5L, 3L, 6L, 12 L and 30 Litre kits.
